FACT SHEET

Company Profile

TICE is a young startup, from Berlin, offering a secure digital solution for location-based coordination.

TICE stands for Time and Place.

Users can see each other on a private map, get directions to a meeting point, review their routes and time of arrival - all in real-time.

TICE can be used in the form of an app or as a web application. It offers individuals and companies the opportunity to coordinate friends, colleagues, and customers through secure real-time live location sharing.

The application can be used in many different fields, like for example in delivery logistics, the tourism industry, the security sector, sports clubs or for a meeting with friends.

In addition to transparency, the company focuses on the protection of the user's privacy.

Nobody who has not been explicitly authorized to see the user's location information can even access it.

Security and Privacy are implemented without any exceptions.
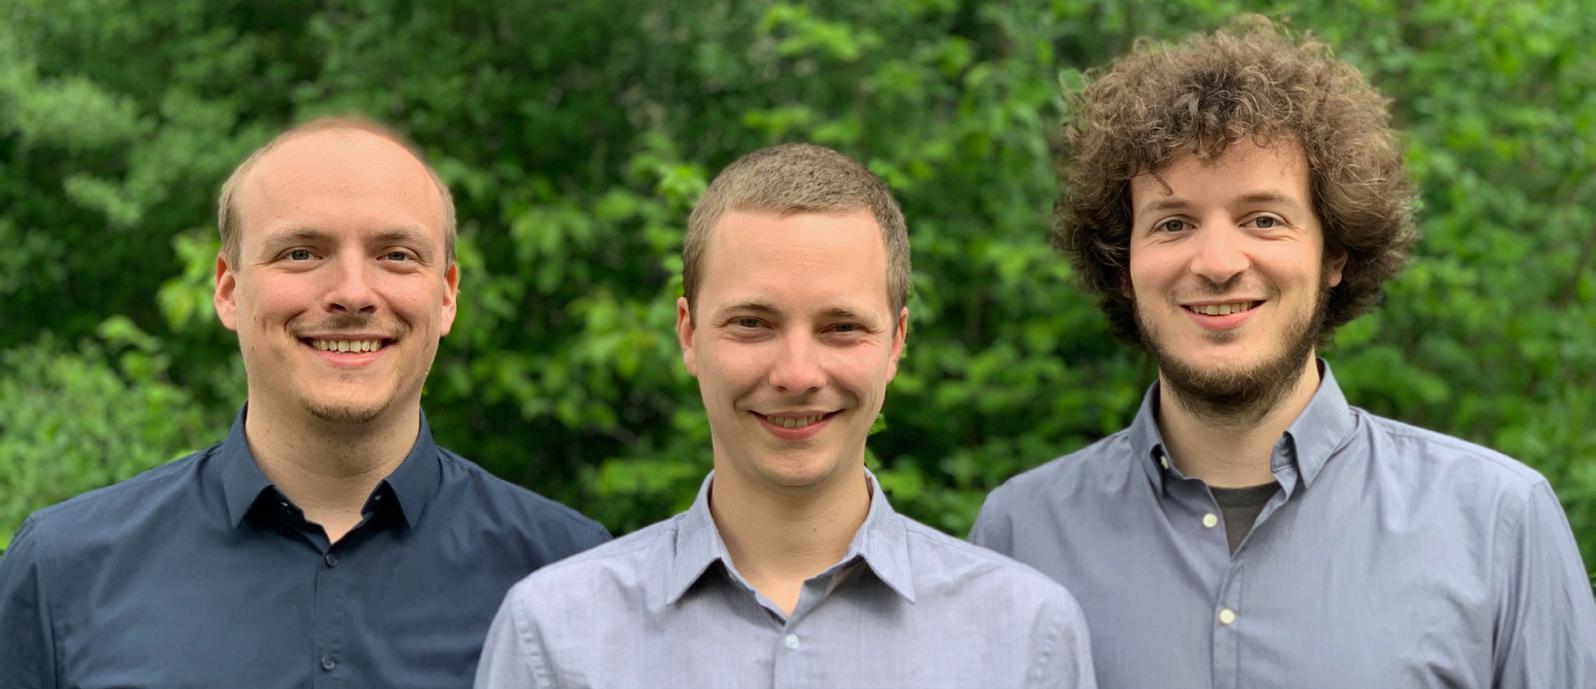

TEAM

Founders

The founders Andreas Ganske, Fabio Tacke, and Simon Kempendorf share a passion for data security and internet privacy.

Based on the question of how people are able to find each other easily while still protecting their user data, the team decided to develop a suitable application.

Andreas Ganske,

As a visionary and a maker in the team, he constantly develops the vision and strategy of TICE, communicates actively with partners and lays the foundations for the right positioning of TICE in the market.

He has the vision that TICE will be used as a global tool for safe local coordination - universally, for individuals and businesses.

Fabio Tacke,

is the organizer and thinker at TICE, he controls both the operational business and frontend development.

As an organizer he uses TICE, e.g. for the planning of weekend trips. He is convinced that TICE reduces organizational effort and is fun for everyone.

Simon Kempendorf,

has the role of networker and developer. He is also responsible for finances, human resources, and backend development.

With so many meetings during the daily business, he uses TICE to coordinate the meetings as easy as possible and to keep the overview.

WE ARE **TICE**
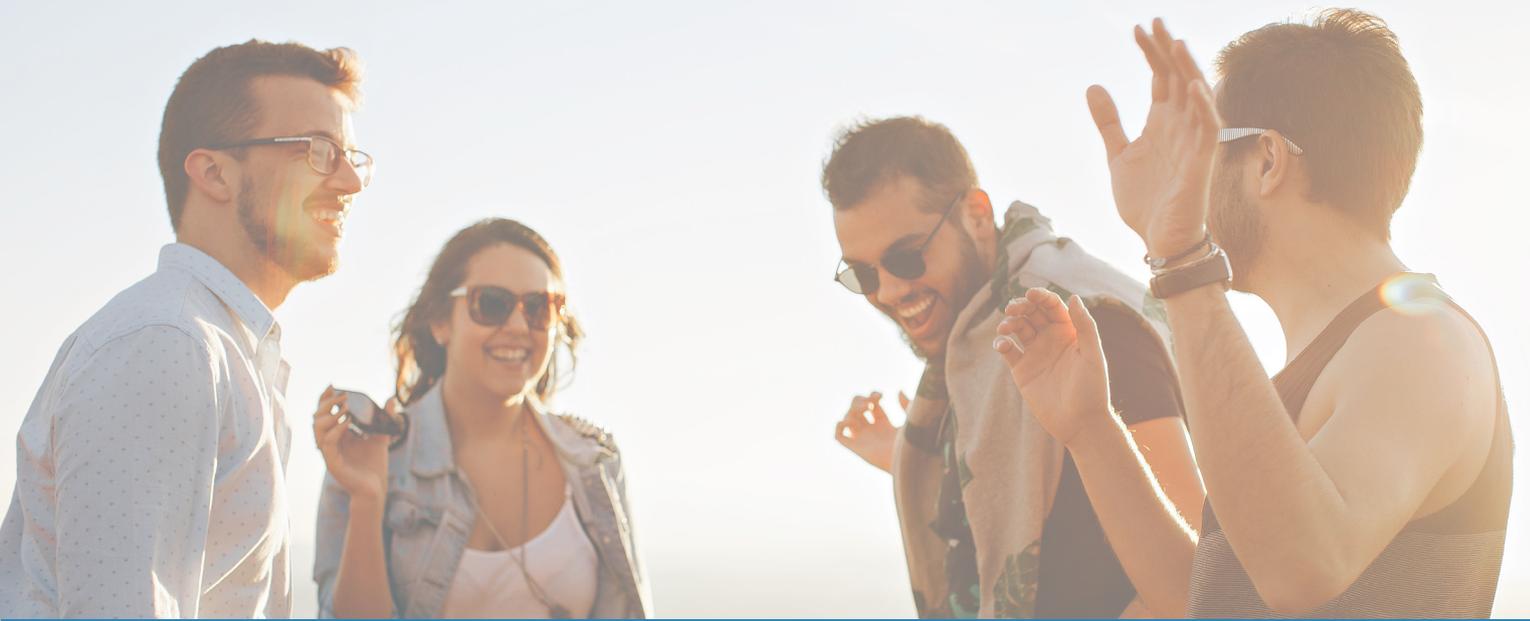

FEATURES

Easy Coordination

Invite to a TICE Meet-Up and you can directly see the participants and their arrival times cin real-time on a map.

Meeting Points & ETA

TICE calculates times of arrival, navigates to the meeting point and notifies in case of delays.

Private and Secure

Privacy-by-design through end-to-end encryption and high level user data protection.
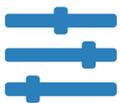

Full Control

Full control and personalized location sharing settings.

For Everyone

TICE is universal: for private users, busin-esses - on iOS, Android or in the Web.

Made in Berlin

We are a young startup from Berlin, developing TICE out of passion.

UNIQUE SELLING POINT

PRIVACY BY DESIGN

TICE relies on Privacy-by-Design.

Privacy-by-design is implemented through end-to-end encryption and modern cryptography, which provides encrypted data such as geofencing and proximity notifications.

Thanks to this modern encryption method, no user data gets into the hands of third parties - not even in the hands of the company.

The founders want to create awareness for a sustainable use of user data and privacy Internet privacy.

PRIVACY BY DESIGN & MODERN ENCRYPTION

PROTECTION OF SENSITIVE LOCATION DATA FROM OTHERS
-
EVEN FROM US

FRIENDS AND FAMILY

Choose a location and see when family, friends and acquaintances arrive at the meeting point.

DELIVERY LOGISTICS

With TICE suppliers and employees can share their locations with the customer and thus increase customer satisfaction.

CAN BE USED IN DIVERSE FIELDS
-
4 USE CASES

SECURITY

TICE supports security staff to coordinate themselves professionally on a site. Data protection through end-to-end encryption.

CITY TOURS

TICE allows you to see the guide and/or participants in real time on a map. Nobody loses touch before or while a tour.

REFERENCES

Cooperation

The TICE project already exists since mid-2018. In October 2019, the team decided to found their company.

The project is funded under the EXIST program until December 2019.

The team wants to work with strong partners and help to set new standards in quality of service.

TICE is in development - which makes it easy to react efficiently and flexibly to new challenges and ideas.

Together we can significantly improve the quality of future meetings, employee coordination and customer satisfaction.
